SUPPLEMENTARY INFORMATION:

Description

The energy information collection submitted to OMB for review contains:

1. *Collection of Information:* FERC-585 "Reporting of Electric Shortages and Contingency Plans under PURPA 206".

2. *Sponsor:* Federal Energy Regulatory Commission.

3. *Control No.:* OMB No. 1902-0138. The Commission is now requesting that OMB approve a three-year extension of the current expiration date, with no changes to the existing collection. There are no changes to the reporting burden. This is a mandatory collection requirement.

4. *Necessity of Collection of Information:* Submission of the information is necessary to enable the Commission to carry out its responsibilities in implementing the provisions of Title II, Section 206 of the Public Utility Regulatory Policies Act of 1978 which amended Section 202 of the Federal Power Act (FPA) by adding subsection (g). (16 U.S.C. 824a). These statutes provide the Commission with the authority and responsibility to require public utilities to report to the Commission, and appropriate State agencies, any anticipated shortages of electric energy or capacity which would affect the utility's ability to serve its wholesale customers and to report and periodically revise, their contingency plans for such occurrences which would equitably accommodate both retail and wholesale customers. The information reported under Commission identifier FERC-585 enables the Commission and appropriate State agencies to exercise electric continuity of service oversight in accordance with the Act as referenced above. Without this information, the Commission and State agencies would be unable to: (1) Examine and approve or modify utility actions, (2) prepare a response to anticipated disruptions in electric energy, and (3) ensure equitable treatment of all public utility customers
